Introducing the 1750

mirage
screen systems

Unlike a traditional swinging door a Mirage Retractable Screen is only across a door opening when you need it to be. Additionally, because the door is stored out of sight when not in use, it will not distract from the appearance and beauty of the door.

- **Cool and ventilate the home**
- **Keeps insects out**
- **Screens that stay out of your way**

Applications

In-Swing Doors

When the original door swings to the inside, the Mirage screen door will install on the outside of the doorframe.

Sliding Doors

Mirage screens can be fit to patio are made to fit sliding doors.

Out-Swing Doors

When the original door swings to the outside, the Mirage screen will be installed on the inside of the doorframe.

French / Double Doors

Two Mirage doors are used, mounted on each side of the opening. This type of application cover openings up to 10 feet wide
